

## Cleansing balm

Sensitive skin make up remover

### Ingredients

Phase	%w/w input	Ingredient
A	61.40	Caprylic/capric triglycerides
A	5.00	Jojoba oil
A	5.00	Almond oil
A	15.00	Glyceryl stearate (Cithrol GMS N/E)
B	5.00	Lecithin
B	5.00	Polysorbate 20 (Liposorb L-20)
B	1.00	Witch hazel extract - glycerin
C	2.00	Tomato Lycopene - Apricot Kernel Oil
C	0.50	Tocopherols - mixed
C	0.10	Chamomile German (Chamomilla Recutita) flower essential oil

### Method

1. Combine ingredients in phase A. Heat to 75°C and stir until fully melted and homogenous. Remove from heat when melted but put back on heat if product starts to solidify while completing step 2 and 3.
2. Combine ingredients in phase B and stir until homogenous - make sure this step is completed and product is homogenous before continuing.
3. Add phase B in small portions to phase A, stirring under low shear and ensuring combined homogenous before continuing. Continue adding in small portions and stirring in between each addition until all phase B has been added. Stir again to ensure it is fully homogenous before finalising.
4. Allow to cool a little, but still remain liquid (approx. 65°C) then add phase C. Stir through until homogenous.
5. Pour off while product is still molten (approx. 65°C). Cap when product has cooled below room temperature.

**Disclaimer:** This formula and method has been developed based on the theoretical selection of listed ingredients; all costs associated with producing a sample of this product is the user's responsibility including any reworks or fails. IPCS recommends a 100g lab scale sample be made and pilot production prior to full scale production.

Please refer to supplier Safety Data Sheets (SDS/MSDS) to ensure safe handling of all raw materials. IPCS holds no responsibility for inappropriate use of materials selected, the formulation or method, in part or as a whole.

It is a condition of use of this formula and method that the user holds full responsibility for ensuring safe and correct use and storage of any materials they source and use, as well as ensuring compliance with local regulations and 'clean product preparation' steps are followed when producing samples, especially for use by others. Evaluations of the safety, stability and suitability of this formula, method and finished product are the sole responsibility of the user.

The information provided on this site is of a theoretical and general nature and does not represent brand or product specific advice. IPCS shall not be responsible for any damages resulting from use of or reliance on this information.

INCI names provided on this site are used as a guide to assist with selections and product descriptions. Users will need to source and check full material information from their suppliers and prepare compliant ingredient lists specific to the materials they actually use.
